District Water Usage Survey

1. Please fill in the table:

Las Positas College	2010	2011 (July-Dec)	2012	2013	2014
Reclaimed Water Consumption (Gallons)	n/a	25,357,200	32,187,188	41,173,660	36,328,864
Water Cost	n/a	$ 72,845	$ 97,721	$ 133,559	$ 118,487
Potable Water Consumption (Gallons)		5,473,864	12,866,348	10,377,752	16,927,240
Water Cost		$ 21,460	$ 51,107	$ 57,710	$ 81,236

Las Positas College receives its landscape irrigation water as effluent wastewater from the City of Livermore. Potable water is not used in any landscape irrigation.

Chabot College	2010	2011 (July-Dec)	2012	2013	2014
Well Water Consumption (Gallons)	n/a	n/a	n/a	n/a	n/a
Water Cost	n/a	n/a	n/a	n/a	n/a
Potable Water Consumption (Gallons)	n/a	4,600,948	9,920,724	10,566,248	12,240,272
Water Cost	n/a	$ 51,731	$ 122,175	$ 132,487	$ 119,175

Chabot College gets the irrigation water from an on-site well. This well is not metered, therefore we have no accessible data on irrigation water usage. Potable water is not used in any landscape irrigation.

2. What measures has your district implemented to reduce water consumption by 20% in cooperation with the Governor's Proclamation of a State of Emergency on January 17, 2014?
Each campus is unique, in reference to water issues. The Grounds department of M&O respectfully recognizes that we are in a drought situation. We have self-imposed reductions already in place, as I have described below:

LPC is exempt from any drought restrictions because they are an outlet for the City of Livermore's reclaimed water - we have no choice but to use it to water, allowing the turfgrass, soils and soil biology to filter the reclaimed water as it works its way back into the aquifer. Some plants are susceptible to the high Nitrogen (and Salts) levels, and we have begun to slowly convert those areas to plants that can sustain existence in that environment.

Chabot College has its own private well water on property that supplies our campus grounds without impacting the City potable water supply. While we have respectfully recognized the CA Drought and the social impact our actions may have within the community, we have considerably reduced our usage so that we MAY be responsible stewards of our environment. The only areas that we have declared exempt from these self-imposed reductions are on our sportsfields (Baseball, Softball, Soccer) to preserve the players safety.

District Water Usage Survey

3. What additional measures is your district considering to further reduce water consumption by a total of 25% through February 2016 in cooperation with the Governor's Executive Order B-29-15 released on April 1, 2015?
   The Grounds department of M&O respectfully recognizes that we are in a drought situation, and has taken immediate action to further reduce our lawn areas and landscape beds by an additional 20%, except for high usage areas (amphitheater lawn and sports fields).

4. If your district has a water plan approved by the Board of Trustees, please attach a copy or provide a link to the document from the district's website.
   None available

5. If your district is subject to a water reduction mandate by your water municipality, please briefly describe the mandate and the district water conservation efforts.
   None available
