

Self-Paced Accessibility Courses

Learn the essentials for ensuring the accessibility of instructional materials in these self-paced courses. In collaboration with @ONE, the CCC Accessibility Center has designed a series of free, online micro-courses in Canvas that focus on accessibility best practices. These courses focus on the basic practices for creating accessible content and instructional materials so as to support access for students with disabilities and all other members of the campus community.

Please note: these are self-paced, non-facilitated courses and are not eligible to receive a badge or continuing education units from the CVC/OEI or CCC

Accessibility Center. <https://cccaccessibility.org/training/self-paced-accessibility-courses>
[View the Accessibility Essentials micro-courses](#) and enroll in a course.

Available courses include:

Canvas Accessibility

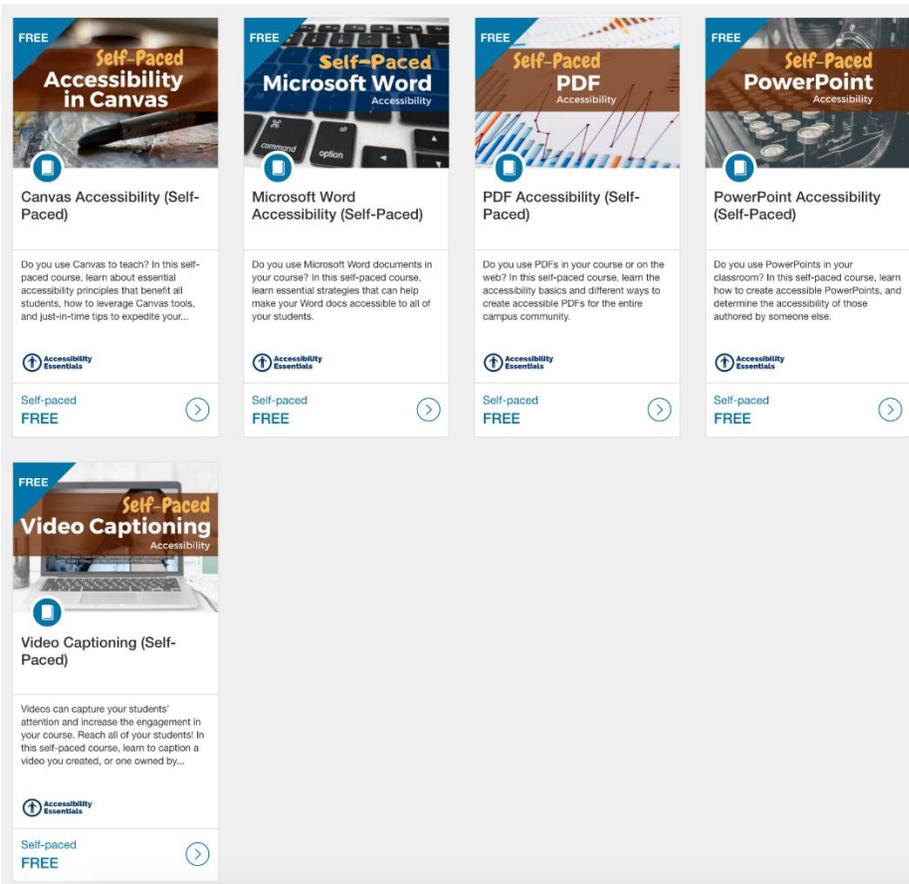

Microsoft Word Accessibility

PDF Accessibility

PowerPoint Accessibility

Video Captioning

...and more

Each course is delivered via Canvas and includes hands-on exercises, video demonstrations, and solutions to create and deliver accessible content. [Browse the @ONE course catalog](#) for additional online training opportunities. <https://catalog.onlinenetworkofeducators.org/>
