# Measure B Projects Nearing Completion

# Measure B Projects Support Sustainability

**24% more Efficient**  
Our buildings are 24% more efficient than traditional buildings

**30% Less**  
Innovative technology helps reduce water consumption by 30%

**Bioretention Basins**  
Bioretention basins help mitigate storm water run-off and keep pollutants out of the watershed

**Non-Toxic**  
Campus uses non-toxic, green cleaning methods

### Student Success Scorecard

In its commitment to increase transfer and degree and certificate attainment, the California Community Colleges Board of Governors has established a performance measurement system that tracks student success at all 112 community colleges.

This scorecard represents an unprecedented level of transparency and accountability on student progress and success metrics in public higher education in the United States. The data available in this scorecard tell how well colleges are doing in remedial instruction, job training programs, retention of students and graduation and completion rates.

### Salary Surfer

As students and their families make important decisions about investing their time and money in pursuing a college education, the California Community Colleges Chancellor's Office is making available for the first time comparative information about the earnings of recent graduates who received an award in a specific program area at California community colleges.

The Salary Surfer uses the aggregated earnings of graduates from a five year period to provide an estimate on the potential wages to be earned two years and five years after receiving a certificate or degree in certain disciplines. This tool also provides information on which colleges offer programs in those specific disciplines. The Salary Surfer does not contain information about wages earned by community college students who transfer to a four-year institution.
