---

Joel,

I want to let you know that NetTutor has been purchased and there is a group meeting this week to work out the logistics of the implementation. The service should be up and running by January. It will provide on line tutoring 24/7 and we are eagerly waiting to see what the demand will be. We have purchased 800 hours so there should be more than enough hours to last for at least one year. More to follow.

Regards,

*Barbara*
