Account 5887 (Program Contingencies)

5887 is used as a "holding spot" to store unallocated budget. While it is an "expense" account code, it is not an account code that expenses can be charged to. Instead, it is used to store the remaining amount of a budget if the club is unsure of where to allocate it to. For example, if a club has \$1000 in total funds and only plans to spend \$500 on food (5884) and \$250 on supplies (4020), the remaining \$250 can be budgeted under 5887 as "unallocated budget." This allows the club to see how much of their funds they haven't planned out. Should the club then decide to allocate another \$100 to supplies (4020), they can reduce the budget in 5887 by \$100 and increase the budget in supplies (4020) by the same \$100. This keeps the overall expense budget balanced while also allocating the budget appropriately, according to the club's planned expenses.
