
COMPUTER SCIENCE

COMPUTER SCIENCE

Las Positas College offers Degrees and Certificate programs in Computer Science that prepare students for direct job entry and/or preparation for transfer to a four-year university. These programs cover a wide range of computer related professions that include programming, systems analysis, data processing, computer research and data management. Students will learn to direct computer operations by writing detailed instructions in computer languages to solve a variety of problems in business, government, and science. These include information acquisition, processing storage, and transmission, using computers and computer peripherals. Principal areas of study within computer science include computer systems and networks; database systems; human factors; numerical analysis; programming languages; software engineering and theory of computing.
