

FALL 2023 FINAL EXAM SCHEDULE

Fall 2023 final examinations for full-term classes will be held December 13, 2023 - December 19, 2023. Your final exam might not always occur at the same time as your class. Please carefully check the chart below to determine the time and day of your final exam. The schedule below applies to final exams given in face-to-face classes, hybrid courses (online with in-person meetings for exams, labs, or skills instruction), and online courses taught synchronously. Instructors teaching online asynchronously, or a combination of asynchronous and synchronous, will clarify their final exam instructions on the class syllabus. This final exam schedule applies to full-term classes only.

The first hour and the first day of the week that day classes meet determines placement of the final exam. In determining the examination time for lecture-laboratory classes and lecture-discussion courses, the lecture period determines the time. For stand-alone lab course (with its own CRN Number), a two-hour final examination will be given during final examination week. The first hour and the day of the week that the laboratory class meets will determine the placement of the class in the schedule below. If you have a question about when and where your final exam will take place, please contact your instructor.
