

CCP 1060 CONVERTING NONCREDIT TO CREDIT

Students that successfully complete a mirrored noncredit course may request credit for the credit version of the course through credit by exam. The grade earned at the completion of the noncredit course is the grade the student will receive for the credit course.

Mirrored Noncredit Course

A mirrored noncredit course is the same course and course outline as a credit course but offered as noncredit. The expectations of the noncredit course are identical to the credit course, including, but not limited to: Course Content, Course Objectives, Student Learning Outcomes, Methods of Evaluation, and level of rigor.

Adopted: March 3, 2025
