## C2. Math 107 Students' Completion Rates in Math 65

The ratio of students who successfully completed Math $65 / 65 \mathrm{~B} / 65 \mathrm{Y}$ within one year and a half of successfully completing Math 107/107B/107Y (Basic Skills)

Aggregated Data: Fall 2010 to Fall 2015 (11Cohorts)
*Highlighted student groups were disproportionately less likely to succeed in course.

Note: 'Math 65' includes data for Math 65, 65B, and 65Y courses. 'More than one race' category was introduced to the IR Dataset in Fall 2011. Race-Ethnicity data does not include 'unknown' category.
$\sim$ The minimum sample size is 20 . Sample sizes fewer than 20 are not shown, but are included in the total.
Cohort: All degree-seeking students who succeeded in Basic Skills Math (MATH 107, 107B, 107Y) in the fall or spring semester.
Outcome: Succeeded (grade of 'A', 'B', 'C', 'CR', or 'P') in Math 65 within a year and a half.
Percentage Point Gap: The difference between the success rate of the disaggregated subgroup compared to the success rate of all students for a specific outcome. A '-6 percentage point gap or greater' suggests that the subgroup may be disproportionally impacted.

Notes: Students (column B ) who succeeded in MATH 107/107B/107Y in all aggregated cohorts; column " $B / C$ " is the average number of students per academic year (heacount / \# of cohorts). The annual number of students lost ( $D$ ) is the number of student which, if they sucessfully completed MATH 65/65B/65Y, would have closed the equity gap.
